How to set up Tournament Planner to work with Gmail, Hotmail or AOL

Please note, whilst this guide is written for Tournament Planner, the process is exactly the same for League Planner however the images have been taken from Tournament Planner.

Before you can use Gmail, Hotmail or AOL you need to add two extra files into the installation folder of the Tournament Planner by following the steps below:

Step 1

Download the zip file which contains the two files required in the installation folder of TTP.

Step 2

Open the zip file that has been downloaded

Download here

Step 3

Click the **Extract All Files** button at the top of the window and Windows will ask you where to extract the files too. We would recommend this is your desktop or the downloads folder.

Irganize · Extract all files					3E ¥	1	
Favorites	Name	Туре	Compressed size	Password	Size		
	Hashinfo	Text Document	1 KB	No			3 K
Ubraries	libeay32.dll	Application extension	590 KB	No		1	,252.8
	openssl	Application	210 KB	No			480 8
Homegroup	OpenSSL License	Text Document	3 KB	No			78
	ReadMe	Text Document	2 KB	No			31
Computer	💿 ssleay32.dll	Application extension	167 KB	No			335 8
6 items	•	71					

Step 4

Once the files have been extracted, find and **open the folder** you have extracted the file to.

Step 5

Select the **libeay32.dll** file and then by holding the **Ctrl** key on your keyboard select the **ssleay32.dll** file. Both will now appear highlighted.

Step 6

Right click on one of the selected files and select **Copy**.

<u>Step 7</u>

Now in **TTP** go to go to the **Tournament Overview** page and towards the bottom of the left hand side you will see the **Installation path** of TTP.

<u>Step 9</u>

In TTP **close** the program down and **reopen** TTP.

<u>Step 11</u>

Enter your **email account settings** as provided by your **email provider**. The email address settings for Gmail, Hotmail and AOL are given below.

Options X General Player Names Match Colors Scheduling Internet Internet Proxy Server Use a proxy server Address: Port: Email From email address: Outgoing mail (SMTP): Port: This server requires an encrypted connection (SSL) Help My server requires authentication Account Name: Password: Default OK

Step 8

Go to **Computer** and **follow** the **installation path** to where TTP is installed. **Right click** in the white space and click **paste**.

<u>Step 10</u>

Go to Extra \rightarrow Options and select the Internet Tab.

Step 12

Once completed, press **OK** and send a test email via TTP to yourself by adding yourself as a player in TTP.

Gmail

From email address:	Enter your full Gmail email address (username@gmail.c	
Outgoing mail (SMTP):	Enter smtp.gmail.com	
Port:	587	
This server requires an encrypted connection (SSL):		Tick
My server requires authentication:		Tick

Account name:	Enter your full email address (including '@gmail.com')
Password:	Enter your email password

After this please login on your Gmail account https://mail.google.com/ and go to your profile settings

Select Connected apps & sites

Turn the Access for less secure apps to ON

Hotmail
